### **ACADEMIC PROJECTS:**

#### **Project: Classification Of Customer Review Using Sentimental Analysis**

**Description** : When there are large amount of customer reviews, there must be a sophisticated way of classifying those reviews and presenting those reviews in a generalized manner. Our project will do that for you. Taking the datasets as an input, the data is first cleaned, transformed, visualized and accurate results are produced. This can be done using "SENTIMENTALANALYSIS". The main motto of the project is to classify the huge chunks of data into different categories and present the data in a generalized way.

#### **Project: Campus Recruitment System**

**Description** : Campus Recruitment System is a platform that provide interface between students and company. System provides the list of suitable companies to the students, according to their educational qualification, experience and their preferences. System provides the list of eligible students from a pool according to required skills for vacancy of company. In this project I had worked as a customer support for the people who are ready to start their career in their domains and guide them in a success way.
