- Bachelor of Computer Science from National College Bagepalli, Chikkaballapur in the Year 2019

TECHNICAL SKILLS:

Operating Systems: Windows NT/95/98/XP/2000/Server 2003/2007
Databases: MS SQL Server 2000/2005/2008/2008 R2, 2012, 2014, QMC
ETL Tools: SQL Server Integration Services (SSIS), Azure Data Factory
Database Tools: SQL Profiler, SQL Query Analyzer, Management studio Index Analyzer, SQL Agents
Skills and Languages: SQL, Python, Snowflake ,ADF
Reporting Tools: SQL Server Reporting Services (SSRS), MS Excel, QMC, Qliksense,DataBricks

Project : OTIS
Client: **North America**
Role: Support
Environment: SQL Server2014, ADF, Power BI and QMC

Description: Otis Elevator Co. (India) Ltd. Manufacturers, installs, services and repairs various types of elevators, escalators, travolators, high speed gearless elevators, and their components.

Responsibilities:
- Created **Medium** and **complex initial & incremental load Pipelines** to move data from different heterogeneous sources like **on-premise Sql Server, Oracle server, Flat files etc into Azure Blob and then into Azure SQLDB**
- Created **dynamic pipelines and datasets as re-usable component** to carry out data transformations and data movement.
- Hands on experience in creation of Pipelines with different activities like **Copy Data**, **Lookup, SP, For Each, Pipeline, set variable, Wait , Until, etc.**
- Hands on experience with **Data Flow activity** and transformations like **Join, Derived column, Lookup, Aggregate, Pivot, alter row, exists, conditional split, etc.**
- Experience on **diagnosing and resolving** the pipeline failures and issues.
- Has knowledge on **ADLS** and **ADLA** carry out **transformations and aggregations and saving output to ADLS or Blob store.**
- Knowledge on submitting job, analyzing the **stages of jobs** and **low performing vertices** and **optimizing** them.
- Extensive experience on writing sql scripts to pull data from different sources like **SQL Server, MS Access, DB2, and Oracle Server.**
- **Designed** and **created centralized ETL Batch process** which also logs **error handled records.**
- Experience in **performance tuning**, tuned long running **pipelines** and **queries**.
- Worked on **scheduling pipelines** and **cost optimization.**
- Hands on experience in creating Qlik tasks and migrating reports from one environment to other environment and publishing apps into different workstreams.
